

WHOLE SCHOOL PROFILE

We are a community of learners who **challenge** ourselves, **explore** boundaries, and make **connections** to create a positive difference

Challenge | Explore | Connect

WHO WE ARE

Tashkent International School (TIS) offers a vibrant learning environment where students are empowered to challenge themselves, explore boundaries and make connections to create a positive difference in our world. We are a caring and diverse community that creates opportunities for students to engage with each other, our host country community and the wider world.

Established in 1994 by the UN and the embassies of the USA, Great Britain, France, Germany and Korea, TIS is an International Baccalaureate World School accredited by the Council of International Schools and the New England Association of Schools and Colleges. TIS offers International Baccalaureate Primary Years Programme, Middle Years Programme, and Diploma Programme for students from age 3 to 18. TIS fosters international-mindedness and global citizenship and currently has students from 48 different countries.

TIS is housed on a 5 hectare park like campus that serves as a dynamic and welcoming space for our entire community. The campus is used to offer a full Co-Curricular Activities program giving students opportunities to explore, develop, compete and serve. The campus is always buzzing with community events including campouts, picnics, art exhibitions, performances, concerts, market days, fundraisers and tournaments. You will see it being enjoyed after school and on weekends by families who are connecting with each other and enjoying the school atmosphere.

A DAY IN THE LIFE OF TIS

Classes begin at 08:20 everyday and students are dismissed at 15:20. Co-curricular Activities and clubs start at 15:30 and continue in the afternoon until 17:00.

Both the Elementary and Secondary schools run on a 10 day rotating schedule that allows for students to work with a variety of teachers across a diverse range of subjects. During break and lunch times students can make use of the whole campus to play and relax. Students move around campus visiting subject specific areas such as our Black Box Theater, Visual Arts studios, Maker Spaces, Design labs, Science labs, Music rooms, Aquaponics and collaborative learning spaces that encourage students to develop across disciplines.

Both the Elementary and the Secondary schools have their own Social/Emotional Counselor and a team of Learning Support teachers. We also have a team of English Language Learners (ELL) teachers working to support our students who are developing their English language skills.

Early mornings, afternoons and weekends are filled by our athletics program where our students compete in a variety of sports against local schools as well as other international schools from around Central Asia and Eastern Europe.

Primary Years Programme

The PYP at TIS challenges young students to connect with the world around them, explore big ideas from multiple perspectives, and develop their critical thinking skills. Through inquiry-based learning and transdisciplinary themes, TIS students connect their learning with understanding and action. By challenging assumptions and exploring their personal values and beliefs, TIS students develop a sense of social responsibility and global-mindedness that prepares them for lifelong learning.

Middle Years Programme

The MYP at TIS encourages students to connect their learning to the world around them, challenge their assumptions, and explore complex issues from multiple perspectives. Through inquiry-based learning and a student-centered approach, TIS students develop critical thinking skills and intercultural understanding. TIS students develop a sense of social responsibility and global-mindedness that continues them on their lifelong learning journey.

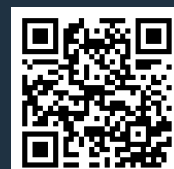

Diploma Programme

The DP at TIS challenges students to explore their academic potential and connect with global issues, while exploring their own values and beliefs. Through inquiry-based learning, students are encouraged to challenge their assumptions and explore different perspectives, developing critical thinking skills that prepare them for higher education and the world of work.
